

ARROW

ACCU-CUT ADVANTAGE

- ◆ Beltless load cradle
- ◆ Proven track record
- ◆ User friendly design

The Arrow, our most popular model, is a high volume, extra heavy weight machine for all businesses.

- ◆ One person can unroll, inspect, measure, cut, reverse roll and wrap all your carpet and vinyl simply and accurately.
- ◆ User friendly computerized logic controls automatically ensure accuracy for all flooring no matter how thick the pile or what type of backing.
- ◆ The Arrow's steel frame incorporates laser cut precision and is welded, not bolted, providing you with the strongest and most durable machine frame available.
- ◆ Large table top allows you and your customers to inspect the carpet or vinyl before it goes out the door.
- ◆ The Arrow can easily be moved on it's industrial strength casters. Engage the lifting brakes to raise the machine off the floor and keep it stationary.
- ◆ Wrap around foot cable control provides the operator with a way to engage the rollers from the front or side of the machine. Makes wrapping and taping rolls simple.

“Your complete source for floor covering cutting and merchandising equipment.”

We deliver most machines with our own trucks and drivers to ensure that you receive proper training.

We will not leave the machine unless you are totally satisfied!

ON-SITE TRAINING

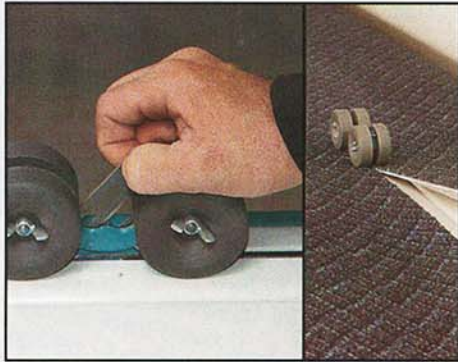

ACCURATE

The digital foot/inch counter is easily programmed with the desired cut size and will stop automatically.

The operator can inspect the material instead of watching the counter!

Patented, "Quicker than Air", two direction cable cutter uses standard blades and applies pressure to the material being cut.

Get a straight, clean cut every time!

FAST, STRAIGHT CUTS

AUTOMATIC VARIABLE SPEED

The variable frequency drives adjust to the proper speed automatically.

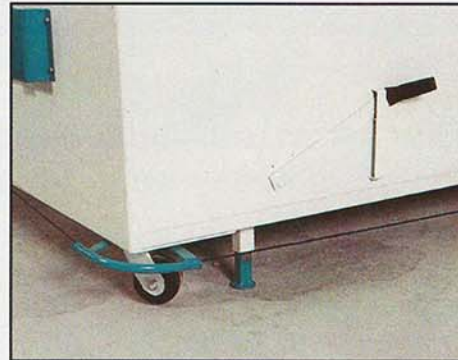

This advanced feature makes the Arrow even more user friendly!

The Arrow's open ended, beltless load cradle holds even the largest rolls. As the diameter of the roll decreases it is automatically centered in the cradle by the other rollers.

This ensures the material rolls up straight and tight every time!

BELTLESS LOAD CRADLE

ONE PERSON OPERATION

Wrap around foot cable control, spring loaded roll up arm and dumping mechanism provide for ease of use.

All are standard features on the Arrow!

All ACCU-CUT machines will measure, cut and roll vinyl.

You won't ever have to worry about damaging vinyl by rolling it out on the floor!

CUTS VINYL

REVERSE ROLL

Rolling carpet or vinyl pile/pattern side out is a simple one person, one step process.

Keep your remnants clean and easily wrap them for display!

SPECIFICATIONS:

POWER: 220 volts - single phase/60 hertz/15 amps
 BLADES: uses standard slotted, double edge blades
 SIZE: 6' 6"W x 16'L x 3' 6"H

Meets all UL and CSA safety standards.
